

BLUEPRINT AUDITOR DRAWINGS → QUANTITIES.

Drop in a drawing set. It reads the sheets, measures the quantities, and flags what the drawings contradict — before it becomes a change order. Try it free on your own drawings at marapone.com/construction/blueprint-auditor.

WHAT IT DOES

- ▶ **Quantity takeoff** read straight off the PDF drawing set — rooms, areas, doors, windows, fixtures
- ▶ **Scope-gap detection** — what the specification calls for that the drawings do not show, and vice versa
- ▶ **Coordination conflicts** flagged between disciplines before you mobilise
- ▶ **Ontario Building Code** compliance checks against the 2024 OBC and SB-12
- ▶ **Tender risk scan** — onerous clauses, bonding, liquidated damages and fair-wage exposure in the bid documents
- ▶ **RFI, deficiency and change-order lists** generated and cross-referenced to the drawings
- ▶ **Unlimited drawings** — no per-sheet, per-project or per-seat fees, ever
- ▶ **Feeds the AI Estimator** — one click from measured quantity to priced bid

ON SCREEN

The screenshot displays the Marapone Blueprint Auditor software interface. The top navigation bar includes tabs for Summary, Audit, Rooms, Takeoff, Costs, Changes, Live Pricing, Benchmarks, Blueprint, Issues, and Activity. The left sidebar contains a 'WORKFLOW' section with links to Home, Upload, Results, Export, Portfolio, Projects, Analytics, Solutions, and a 'RISK & COMPLIANCE' section with links to Scope Gap, Tender Risk, and CO Risk. The main content area is divided into three sections: 'BY TYPE' with a circular progress indicator for 33 rooms, a table of room areas in square meters, and an 'ACTIVITY LOG' showing a timeline of construction events from January to April.

How you buy it. One payment of \$990 + HST, unlimited users. The working application arrives on day one; the **full source code on day 31**, once the 30-day refund window closes. No licence key, no activation server, no kill switch, no subscription. Runs on your own hardware with no outbound connection during processing — your drawings never leave your network. Pair it with the AI Estimator for \$1,690 and never retype a quantity again.
